FRESH GRADUATE · JUNIOR WEB DEVELOPER

HI, I'M ALFATIH. WEB DEVELOPER.

ALFATIHNAMAN
BADHARIJA PUTRA MADVI

BANDUNG,
INDONESIA

I'm a fresh **Informatics Engineering graduate** who enjoys building straightforward web apps and learning how each part works.

CURRENT STAGE
Fresh graduate

WHAT I BUILD
Web apps and interfaces

HOW I WORK
Learn, build, improve

A little about me.

I recently graduated in Informatics Engineering from UNIKOM. I started learning software development in SMK Medikacom, then kept building small projects through college and my internship.

I'm comfortable working with front-end code, databases, APIs, and the basic flow behind a web application. I'm still early in my career, and I like learning by building and improving things one step at a time.

2018–2021
Vocational School
SMK Medikacom

2021–2026
University
UNIKOM

2025
Internship
Web development practice

What I work with.

I use these in coursework, personal projects, and internship work. Most comfortable with the web basics and keep improving through hands-on projects.

01

Languages and frameworks

The main building blocks I use for web interfaces and application logic.

HTML & CSS · JavaScript · TypeScript · Java · React · Next.js

02

Databases

The tools I use to structure, query, and work with application data.

SQL | MySQL | Data modeling

03

Tools I use

The everyday tools that help me build, connect, and maintain a project.

Git & GitHub | REST APIs | Chrome Extensions | OpenAI API

My projects.

Six projects from coursework, internship, and personal practice.

CASE #01

Online Gambling Ad Blocker

A Chrome extension I built to help detect and hide online gambling ads. The project also became part of my final research at UNIKOM.

Manifest V3 · Heuristic scoring · Published research

CASE #02

ISBI Helpdesk & Asset Management

A web app I worked on during my internship to help campus staff handle support requests and keep track of IT assets.

Web application · Helpdesk · Asset reporting

CASE #03

Employee Dashboard

A dashboard for adding, updating, and organizing employee records in one place.

Dashboard · Database · Records management

CASE #04

Cinema Ticket Booking

A Java project my team and I built to cover the main steps of booking a cinema ticket.

Java · Booking flow · Team project

CASE #05

AI Image Generator

A small web app that turns a written idea into a prompt and uses it to generate an image.

Generative AI · Web application · Prompt design

CASE #06

Smart Parking System

A web app for checking parking availability and booking an open space.

Booking · Slot management · Web application

How I learned.

My education gave me the basics, and short courses helped me explore web development, networking, English, and cybersecurity.

2018–2021

SMK, Rekayasa Perangkat Lunak

Software development studies with hands-on programming projects

2021–2026

Universitas Komputer Indonesia

Bachelor of Informatics Engineering · S.Kom. · GPA 3.40

Credentials

Education diploma plus five course and professional credentials.

Bachelor of Informatics Engineering Diploma Universitas Komputer Indonesia, UNIKOM	19 FEBRUARY 2026	Certificate serial: 11.01.1.6808
Junior Web Programmer BNSP · LSP Teknologi Digital	20 MARCH 2025	Certificate number: 62090 2513 3 0136337 2025
English Proficiency Test UNIKOM Language Center	9 NOVEMBER 2024	Certificate number: 17.24.03260
Introduction to Software Engineering RevoU Coding Camp	3 JULY 2026	Credential ID: CCSE-290626-01-1-00040
Cybersecurity Essentials Cisco Networking Academy	8 MAY 2024	Verification: QR-verifiable credential
Introduction to Cybersecurity Cisco Networking Academy	20 MAY 2024	Verification: QR-verifiable credential
CCNA: Introduction to Networks Cisco Networking Academy	20 FEBRUARY 2023	Verification: QR-verifiable credential

WANT TO TALK ABOUT A JUNIOR ROLE OR A PROJECT?

LET'S HAVE A CONVERSATION.
